SYSTEM TWIST BACK

The three dimensional ergonomic form of VIDA features high technology flexible and durable material support. It helps maintain spinal alignment; starting with the lower back and up to the neck. VIDA mimics your body and movements, allowing you to work in motion.

Backrest Tilt

Synchronously moving seat during the back tilt offers balanced protection of the distance between the lower back and sitting surface.

Pro-Support®'s backrest tilt offers 23 degrees of back tilt. Can be limited positioned in three preset angles and locked in an upright position.

Seat Depth

Adjustable seat slide allows for a good 10 centimeters of back-forward adjustment. It helps users with different upper leg length to sit in a healthy position

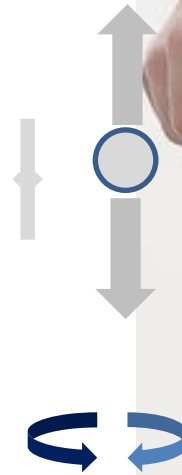

Backrest Height

Core's backrest height can be adjusted for your height or working positions. With this feature, Core increases productivity at work by supporting the upper body.

Armrest Width

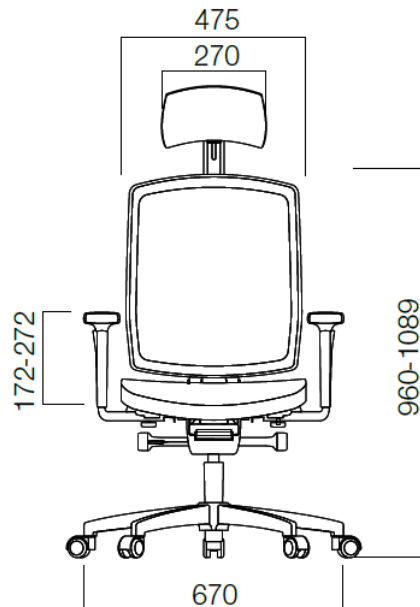

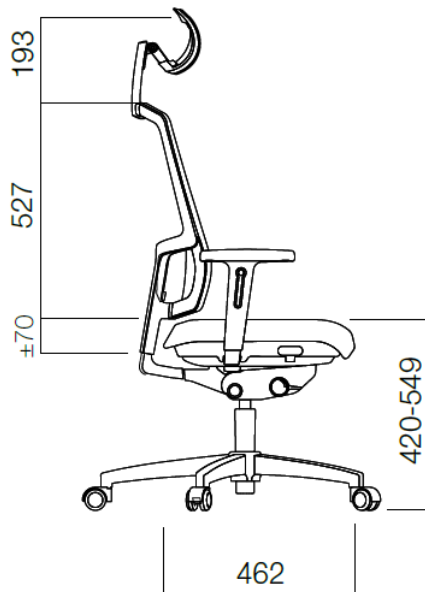

Minimize articular disturbances caused by long hours of work. Reduce accumulating fatigue in the shoulders and the neck by customizing the armrest width to your body and your task.

Neck Support Height & Angle

Minimize the conditions that may occur in the neck with adjustable neck support height. Customize support angle for comfort
